

THEE VIBRAFINGERS

THEY VIBRATE CD TURBOROCK RECORDS

Thee VibraFingers are an effective concentrate of what was best (or worst ?) produced in Rock'n'roll. VibraFingers are 4 musicians from the Mini Cooper Gang, Fingertips and Thee Mysterious Asthmatic Avenger. Since the middle of the Nineties, these fuzz and high power lovers from Tours, invaded an incredule world with their electric and raging shows. Often classified in an energy punk-rock style with garage sounds, the VibraFingers will forever be the bastard spirits born of a giant orgy with the Cramps, Teengenerate, Oblivians, Stooges, Buzzcocks, Charlie Feathers, Flaming Groovies... and of course all underground and deviant stuff that were produced in the 50's, 60's and 70's. Fans of B, Z and gory flicks, the VibraFingers are the ambassadors of a shifted Universe where values are not the same anymore : nasty rubbery monsters, cheapy emoglobine, masked wrestlers are totally included in their reality ... the good ones are not always those we could expect (Sometimes good guys don't wear pink !)

The VibraFingers are indeed the Craignos-Rockers of a rock'n'roll scene in complete deserection.

But these freaky guys have never taken themselves seriously, and in their shows, humour and inventiveness always surrender the arrogant succession of gimmicks proposed by the "revival" rock'n'roll.

The VibraFingers met Rock'n'roll when they were young :

- an experience of rock'n'roll radio DJ for all these members,
- many hours lost watching videos with meaningfull titles (Plan nine from outer space, House Of 1000 Corpses, 2001 Maniacs...),
- listening to all the American bands from Crypt Records in the Nineties created this breeding ground in which the VibraFingers tracks were born.

Sound shock as it is, the sound of VibraFingers moved and improved. If stage is unquestionably their best expression, the release of this new album

could establish a good balance between recordings and shows. Indeed, the brutality of their shows is well represented by an aggressive production combining good bunches of fuzz guitar and a heavy bass-drums rhythmic. Something that should blast off your 3000 dollars speakers....
